DETAILED ACTION

Response to Arguments

1. Applicant's arguments, filed 9/23/2008, with respect to claims 1, 3, 4 and 8-12 have been fully considered and are persuasive. The rejections of claims 1, 3, 4 and 8-12 have been withdrawn.

Allowable Subject Matter

2. Claims 1, 3, 4 and 8-12 are allowed.

REASONS FOR ALLOWANCE

3. The following is an examiner's statement of reasons for allowance: Regarding claim 1, Ollivier et al. (US 6,385,492) was the closest prior art, specifically the embodiment shown in figure 12. However, that embodiment does not show a relief with an overall helicoid structure and a continuous ridge of variable radius extending around and for a length along the cylindrical body. While each spherical structure can be considered a relief, neither spherical structure has an overall helicoid contour, and since they are not connected as a continuous ridge, cannot be considered a relief as a whole. In general, a coronary probe with a retention structure comprising a relief with an overall helicoid structure and a continuous ridge of variable radius extending around and for a length along the cylindrical body, said helicoid structure having a second diameter at the point where said variable radius is at a maximum, wherein said second diameter is

greater than said first diameter, and the retention structure further comprising a second axis formed at the median of the second diameter that is offset from, and parallel to, the first axis, when combined with the rest of the limitations of the claim, has not been disclosed by the prior art.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
